Index of Papers Published in the Journal of Spacecraft and Rockets

Volume 4—January through December 1967

Issue	Pages	Issue	Pages
January	1–128	July	833–960
February	129–288	August	961–1120
March	289–416	September	1121–1280
April	417–544	October	1281–1408
May	545–704	November	1409–1568
June	705–832	December	1569–1696

EN, TC, and SA indicate Engineering Note, Technical Comment, and Survey Article, respectively.

AUTHORS

Abzug, M. J. Final-value homing missile guidance (EN) 279
Achenbach, J. D. and Sun, C.-T. Effect of elastic case on stability of radial modes in solid propellant rockets 214
Adams, David M. Application of the hydraulic analogy to axisymmetric nonideal compressible gas systems 359
——Igniter performance in solid-propellant rocket motors 1024
——A simplified technique for evaluating vibrational and/or chemical relaxation behind shock waves 1034
Adams, Richard H. Wind-tunnel simulation of rocket vehicles in flight with two-phase-flow rocket plumes 518
Adler, B. K. (see Hammond, M. B.)
Affatati, D. A. (see Escobal, P. R.)
Alai, John A. Tension string structure for planetary entry vehicles .. 720
Alderson, E. D. Graphical solutions to orbital mechanics problems .. 20
Allan, Donald S., Bastress, E. Karl, and Smith, Kenneth A. Heat-transfer processes during ignition of solid propellant rockets 95
Allen, G. E. (see Bobco, R. P.)
Alper, J. R. and O'Neill, J. P. A new passive hysteresis damping technique for stabilizing gravity-oriented satellites 1617
Amin, Nasim F. and Mölder, Sannu. Performance comparison of gun-launched scramjets for various fuels (EN) 1089
Anand, D. K., Dybbs, A. Z., and Jenkins, R. E. Effects of condenser parameters on heat pipe optimization (EN) 695
Anderson, Donald L. and Dahms, Richard G. Surface blistering of metals due to low energy hydrogen bombardment 364
Andrews, W. G. and Kirschner, T. J. Heat-sterilizable solid propellant motor designs for interplanetary missions 663
Angelino, Gianfranco Liquid-phase compression gas turbine for space power applications 188
——Comment on "Jet compression for closed-cycle magnetoplasmadynamic electrical power generation" (TC) 1564
Anzel, Bernard M. (see Balsam, Richard E.)
Armstrong, Henry H., Burns, A. Bruce, and Crawford, Ron G. Large stiffened cylinder weight-cost comparisons between Be-38% Al and other materials 370
Ashby, George C., Jr. and Stone, David R. Aerodynamic effect of volume addition to a high L/D wing/body at Mach 6.0 (EN) 277
Azuma, Hisao (see Yamanaka, Tatsuo)
Babcock, R. V. (see Tarnja, K. S.)
Back, L. H., Massier, P. F., and Cuffel, R. F. Flow phenomena and convective heat transfer in a conical supersonic nozzle 1040
Baines, D. J. and Pearson, K. G. Aeroelasticity as a consideration in aerodynamic design of rolling, unguided research rockets 1603
Baker, B. S. (see Gidaspow, D.)
Baker, Wilfred E. and Westine, Peter S. Model tests for structural response of Apollo command module to water impact 201
Balsam, Richard E. and Anzel, Bernard M. Determination of the Pacific equilibrium point for a stationary orbit 1289
Banks, Bruce A. and Richley, Edward A. Radially slotted grids for a Kaufman ion thruster (EN) 1562
Barzda, J. J. (see Hollrock, R. H.)
Bastress, E. Karl (see Allan, Donald S.)
Bauer, Helmut F. and Villanueva, Jose. Mechanical model for longitudinally excited sloshing motion (EN) 1376
Becker, Herbert and Bird, Frederick. Thermoelastic stress concentrations (EN) 1091
Becker, R. A. Thermionic space power systems review (SA) 847
Bell, M. W. Jack An evolutionary program for manned interplanetary exploration 625
Benefield, John W. and Hair, Leroy M. Inlet flowfield analysis for high Mach number applications 650
Bennich, E. R. (see Snyder, J. E.)
Berggren, C. C. (see Levin, H.)
Berman, David (see Molitor, J. H.)
——Satellite thermal simulation by a hybrid computer 243
Berman, Richard J. (see Steck, Harry J.)
Bernhard, F. COTIR wind-weighting technique (EN) 1117
Bernstein, Allen I. and Musicman, Alberto S. MISDAS—A mechanical impact system design for Apollo-type spacecraft 740
Bert, Charles W. and Hyler, Walter S. Design considerations in material selection for rocket-motor cases (SA) 705
Bertram, Mitchel H. Comment on "Viscosity of air" (TC) 287
Bidwell, Jerold M. Additional data on hot days at Vandenberg Air Force Base (EN) 696
——An objective wind criterion for structural design of launch vehicles (EN) 188
Bieber, R. E. Relative influence of atmospheric properties on launch vehicle design 224
Billig, Frederick S. Shock-wave shapes around spherical- and cylindrical-nosed bodies (EN) 822
Billik, B. H. Cross-track sustaining requirements for a 24-hr satellite 297
Bird, Frederick (see Becker, Herbert)
Birkebak, R. C. (see McCullough, B. A.)
Bismut, Marcel and Bouttes, Jacques. Controlled booster stage "BER" for sounding rockets 1248
Blake, Ralph E. Predicting structural reliability for design decisions. 392
Blanco, Thomas T. (see Steck, Harry J.)
Biedjian, Leon. Transient thermal response of multiple-foil high-temperature radiation shields (EN) 1397
Bley, Kenneth B. Analytic determination of perigee passage using Lambert's theorem (EN) 1101
Block, Myron J. X-ray photography by image coding (EN) 809
Bobco, R. P. and Stensgaard, C. P., Jr. Solar incidence factors for thermal analysis of imperfectly collimated radiation in solar simulators 236
——**Allen, G. E., and Othmer, P. W.** Local radiation equilibrium temperatures in semigray enclosures 1076
Bolster, B. D. (see Worbs, H. E.)
Bonin, J. H., Coates, R. L., and Cohen, N. S. Thrust magnitude and restart control of solid motors by injection of hypergolic fluids 354
Boobar, M. G., Repic, E. M., and McDermott, A. M. Approach and entry corridors for aerobraking at Mars and Venus (EN) 682
Bose, T. K. Effect of heat transfer in a converging-diverging nozzle (EN) 401
——Variation of polytropic exponent along converging-diverging nozzle axis (EN) 1391
Boudreaux, R. A. and Tabakoff, W. Boundary-layer attachment flow within a liquid hydrogen tank 1017
Bouttes, Jacques (See Bismut, Marcel)
Bower, J. E. Local buckling strength of fiberglass-wound maraging-steel cylinders 54
Brandmaier, Harold E. and Dimmock, T. Herbert. Factors influencing electro-fluid dynamic power generation 961
Breshears, R. R. (see McDermott, C. E.)
Briglio, A., Jr. (see Ellion, M. Edmund)
Broadwell, J. E. and Tsu, C. N. Transient pressures caused by rocket start and shutdown in ducted launchers 1323
Brown, R. F. and Heald, J. H., Jr. Performance of an aerodynamic molecular beam chamber for cryopumping and adsorption pumping studies 476

SUBJECTS

AERODYNAMICS

Aerodynamic Heating

Effect of gap size on pressure and heating over the flap of a blunt delta wing in hypersonic flow. I. Stern and W. H. Rowe Jr. 109
Radiative vs ablative heat shield concepts for manned lifting entry vehicles. J. W. McCown and R. M. Davis 725
A comparative design analysis of three configurational families for manned earth entry at hyperbolic speeds. D. J. Shapland and W. F. Munroe 732
Flight angle of attack determined from ablative heat-shield patterns. Arthur Miles Whitnah (EN) 821
Effect of heating restraints on synergetic maneuver performance. John S. Clauss Jr. and R. D. Yeatman (EN) 1107
Development of airframe heat protection for a high-performance sounding rocket. David K. Overmier 1500
Effect of trajectory control scheme on the performance of lifting entry vehicles. Janusz Stalony-Dobrzanski 164
An analysis of minimum heat trajectories for entry at hyperbolic speeds. Rodney C. Wingrove 1048
Status of basic shock-layer radiation information for inner-planet atmospheric entry. Fred Wolf and Joseph M. Spiegel 1166
Superlight ablative systems for Mars lander thermal protection. Eric L. Strauss 1304
Radioactive dispersions for radioactive ablation sensors. Robert A. Florentine, J. F. Schneider, and D. S. Gicking (EN) 1083

Entry Vehicles and Decelerators

Effect of trajectory control scheme on the performance of lifting entry vehicles. Janusz Stalony-Dobrzanski 164
Re-entry guidance by threshold network storage of precomputed optimum commands. John C. Elsey, Herbert S. Fong, and Norman H. Meyers 443
Loads on bodies in wakes. J. Peter Reding and Lars E. Ericsson 511
Implications of maneuvering-range constraints on lifting-vehicle design. Johann Lau 639
Shape effects on hypersonic slender body wake geometry and transition distance. Edwin Waldbusser 657
A comparative design analysis of three configurational families for manned earth entry at hyperbolic speeds. D. J. Shapland and W. F. Munroe 732
Recovery of high-performance re-entry vehicles by drag brakes plus parachutes. Harry J. Steck, Richard J. Berman, and Thomas T. Blanco 746
Flight dynamics of a bomb with cruciform tail. W. R. Chadwick 768
Comparison of aerodynamic data from the Gemini flights and AEDC-VKF wind tunnels. B. J. Griffith 919
Ballistic-range blast traversal testing. R. W. Donselman 929
Study of blast-bow wave interactions in a shock tube and shock tunnel. J. Ray Ruetenik and Bo Lemcke 1030
Drag and stability of Mars probe/lander shapes. Maigonis V. Krumins 1052
Free-flight measurements of aerodynamic viscous effects on lifting re-entry bodies. C. C. Horstman and M. I. Kussoy 1064
Determination of angle of attack from rotational body rates. Mark M. Lotkin 1333
Magnetogasdynamic re-entry phenomena. R. Nowak, S. Kranc, R. W. Porter, M. C. Yuen, and Ali Bulent Cambel 1538
Electrodeless magnetogasdynamic power during entry. S. Kranc, Robert W. Porter, and Ali Bulent Cambel (EN) 813
Theoretical investigation of entry vehicle stability in the Mars atmosphere. C. L. Kyriss and H. Rie (EN) 272
Effect of forward-facing jets on aerodynamic characteristics of blunt configurations at Mach 6. J. Wayne Keyes and Jerry N. Hefner (EN) 533
Use of lifting re-entry vehicles for synergetic maneuvers. Joseph P. Paine (EN) 698
Effect of nose bluntness on the hypersonic unsteady aerodynamics of an ablating re-entry body. L. E. Ericsson (EN) 811
Rotor entry vehicle system for safe landings. R. H. Hollrock and J. J. Barzda (EN) 815
Flight angle of attack determined from ablative heat-shield patterns. Arthur Miles Whitnah (EN) 821
Shock-wave shapes around spherical- and cylindrical-nosed bodies. Frederick S. Billig (EN) 822
Calculation of stability derivatives by slender-body theory. S. C. Ghorai and J. B. Clifford, Jr. (EN) 946
Effect of dihedral and cross-sectional shape on high-L/D entry vehicles. Helmuth H. W. Drosdat and Francis X. Hurley (EN) 951
Effect of heating restraints on synergetic maneuver performance. John S. Clauss Jr. and R. D. Yeatman (EN) 1107
Pressure distribution on forward face of blunt bodies at angle of attack. George E. Kaattari (EN) 1110

Importance of recovery-site location in determining entry vehicle requirements for future missions. Paul F. Holloway (EN) 1262
Approximate theory for terminal velocity of a freely falling body. George D. Stilley (EN) 1274
A destabilizing effect of severe nose bluntness. Brian Quinn (EN) 1388
Viscous effects on hypersonic L/D of three classes of manned spacecraft. James N. Mueller and Roger M. Winebarger (EN) 1394
High-altitude hypersonic flow effects on the lateral range capability of entry vehicles. E. Brian Pritchard and Paul F. Holloway (EN) 1395
Impact dispersion due to mass and aerodynamic asymmetries. Barbara F. Fuess (EN) 1402
A parachute recovery system dynamic analysis. M. Neustadt, R. E. Ericksen, J. J. Guiteras, and J. A. Larrivee 321
A method for calculating parachute opening forces for general deployment conditions. Lelan R. Jamison 498
MISDAS—A mechanical impact system design for Apollo-type spacecraft. Allen I. Bernstein and Alberto S. Musicman 740
Gas bag concept for a stowable, omnidirectional, multiple-impact landing system. John R. McGehee 1359
Approach and entry corridors for aerobraking at Mars and Venus. M. G. Boobar, E. M. Repic, and A. M. McDermott (EN) 682
Parachute testing at altitudes between 30 and 90 kilometers. John C. McFall Jr. and Harold N. Murrow (EN) 796
Comment on "A method for calculating parachute opening forces for general deployment conditions." Kenneth E. French (TC) 1407
BALLUTE characteristics in the 0.1 to 10 Mach number speed regime. I. M. Jaremenko 1058

Launch Vehicles and Missiles

Aeroelastic instability caused by slender payloads. Lars Eric Ericsson 65
Effect of gap size on pressure and heating over the flap of a blunt delta wing in hypersonic flow. I. Stern and W. H. Rowe Jr. 109
Aerodynamics of free-flying wind-tunnel models determined from telemetered accelerations. Victor L. Peterson, George G. Mateer, and Dean R. Harrison 503
High-speed analysis of wind-induced dynamic loads on vertically rising vehicles. Chris J. Van Der Maas 583
Experimental control-wing hinge moments of a transonic-supersonic, rolling, maneuvering, guided missile. F. X. Pfenneberger 925
External and internal air loads on sounding rockets. Ralph J. Muraca 1207
Determination of angle of attack from rotational body rates. Mark M. Lotkin 1333
Wind-tunnel and full-scale forces on rocket sleds. Daniel J. Krupovage, Larry C. Mixon, and Otto T. Pokorny 1346
Theoretical studies on the effects of blowing and suction in laminar separated regions. Warren C. Strahle 1352
Sources, mechanisms, and control of roll resonance phenomena for sounding rockets. D. A. Price Jr. 1516
Aerodynamic effect of volume addition to a high L/D wing/body at Mach 6.0. George C. Ashby Jr. and David R. Stone (EN) 277
Dynamic stability of a 5-in. projectile with nonlinear magnus moment. W. R. Chadwick (EN) 1263
An objective wind criterion for structural design of launch vehicles. Jerold M. Bidwell (EN) 1278
Supersonic flow around cones at zero incidence in equilibrium air. M. Visich Jr., E. Lieberman, and H. E. Hudgins Jr. (EN) 1363
A spin-yaw instability criterion for the ascending ballistic missile. L. H. Ohman (EN) 1374
Hypersonic viscous interaction theory for wedge wings. H. Mirels and W. S. Lewellen 492
Calculation of stability derivatives by slender-body theory. S. C. Ghorai and J. B. Clifford Jr. (EN) 946

AEROSPACE ENVIRONMENT

Relationships between geographic and inertial coordinates. W. Gordon Heffron Jr. and Sheryl B. Watson (EN) 531
Multivariate statistical analysis of wind sounding data. Chris J. Van Der Maas 74
On-site rectification of meteorological satellite pictures. S. R. Dauncey 230
Aerospace thermodynamic properties expected above Cape Kennedy for the 1966–1967 period. P. E. Wasko and C. M. Michaux 592
Aerodynamic design considerations and wind-tunnel test of a high-altitude air sampler. Harold C. Larsen 1254
Reynolds number effects on ascending spherical balloons. John B. Wright (EN) 407
Additional data on hot days at Vandenberg Air Force Base. Jerold M. Bidwell (EN) 696
Manned meteorology experiments. Glenn A. Cato (EN) 1094
Effect of Point Arguello wind variability upon range safety. Richard G. Stern (EN) 1112
COTIR wind-weighting technique. F. Bernhard (EN) 1117
Real-time preiaunch meteorological system. Roy I. Glass and Louis D. Duncan (EN) 1276
An objective wind criterion for structural design of launch vehicles. Jerold M. Bidwell (EN) 1278
Ascent trajectory of a superpressure balloon. Kenneth E. French (EN) 1557
Radio occultation investigations of the atmosphere of Mars. Arvydas Kliore and Dennis A. Tito 578
Precision limb profiles for navigation and research. Milo Wolff 978
Multichannel radiometer measurement of solar irradiance. A. J. Drummond, J. R. Hickey, W. J. Scholes, and E. G. Laue 1200
A radio occultation experiment to probe the atmosphere of Venus. Arvydas Kliore, Dennis A. Tito, Dan L. Cain, and Gerald S. Levy ... 1339
Analytical approximations for the density and viscosity of equilibrium air. H. E. Worbs and B. D. Bolster (EN) 801
Van Allen belt simulation. Charles L. Mack (EN) 819
Solar system escape circle. Allen Jones (EN) 957
A synthetic aperture approach to space-based radio telescopes. Francis W. French, Albert K. Rodman, and G. Richard Huguenin .. 1650
X-ray photography by image coding. Myron J. Block (EN) 809
Lunar eclipse of a satellite of the earth. P. R. Escobal and R. A. Robertson (EN) 538
Definition of a science subsystem for a Jupiter flyby mission. B. A. Sodek and J. C. Redmond 1658

BIO-ENGINEERING

Apollo ECS man-rated simulation systems. W. B. Tappen 452
Recent experience with manned tests in the NASA space environment simulation laboratory. R. D. Filbert and H. C. Sherwin (EN) 689
A criterion for space capsule fire hazard minimization. Robert F. McAlevy III and Richard S. Magee (EN) 1390
A new concept in artificial gravity systems. Charles A. Lindley 3
Simulation of aerospace flight acceleration and dynamic pressure environments for biodynamics research. Neville P. Clarke, Walter M. Wolff, John J. Gokelman, and Henning E. von Gierke 751
Transmission of isotropically incident electrons through spacecraft hull materials. Walter K. Stromquist, H. P. Sleeper Jr., and O. L. McDermed 106
Sensitivity of manned planetary spacecraft design to radiation uncertainties. Raymond C. Savin, Jerry M. Deerwester, and Alfred C. Mascy 249
Van Allen belt simulation. Charles L. Mack (EN) 819
Radiation hazard to man from solar proton events. Joseph W. Snyder (EN) 826
Comment on "Radiation shielding of manned Mars vehicles." Jerry L. Modisette (TC) 704
Reply by author to J. L. Modisette. Francis W. French (TC) 704
Manned flight simulation of the Air Force modular maneuvering unit. Ronald C. Croston and James B. Griffin (EN) 270
Water immersion simulation of extravehicular activities by astronauts. Otto F. Trout Jr. (EN) 806
Manned flight simulation of the Air Force modular maneuvering unit. Ronald C. Croston and James B. Griffin (EN) 270
Results and analysis of piloted lunar module landing simulation studies David McCabe, Martin Pollack, and Harvey Sperling (EN) 1368
Analysis of Gemini 7-star sightings utilizing a space sextant in Gemini 6. T. B. Murtagh, C. R. Price, and H. E. Smith 567
Some effects of motion cues on manual tracking. Laurence R. Young 1300
Manned meteorology experiments. Glenn A. Cato (EN) 1094
Synthetic fats as part of a closed-loop life support system. J. W. Frankenfeld, S. M. Kaback, A. Skopp, and J. Shapira (EN) 1671
Project EGRESS. John P. Dunn and Patrick C. Carroll 9
Heat-sterilizable solid propellant motor designs for interplanetary missions. W. G. Andrews and T. J. Kirschner 663

FLIGHT MECHANICS AND TRAJECTORY OPTIMIZATION

A survey of ballistic Mars-mission profiles. Vernon A. Lee and Sam W. Wilson Jr. (SA) 129
Effect of trajectory control scheme on the performance of lifting entry vehicles. Janusz Stalony-Dobrzanski 164
Venus-swingby mission mode and its role in the manned exploration of Mars. Rollin W. Gillespie and Stanley Ross 170
Trajectory design for the Mariner-Mars 1964 mission. Dennis A. Tito 289
Applications of optimal control theory in aerospace engineering. Arthur E. Bryson Jr. 545
Development of the iterative guidance mode with its application to various vehicles and missions. Doris C. Chandler and Isaac E. Smith 898
Comment on "Development of the iterative guidance mode with its application to various vehicles and missions." Donald J. Dobner (TC) 1681
Systematic comparison of Venus swingby mode with standard mode of Mars round trips. J. M. Deerwester and S. M. D'Haem 904
An analysis of minimum heat trajectories for entry at hyperbolic speeds. Rodney C. Wingrove 1048
Trajectory modes for manned and unmanned missions to Mercury: 1980–2000. Larry A. Manning 1128
The two-stage sounding rocket problem. Russell D. Shaver 1310
Some aerospace differential games. R. E. Wong 1460
Synergetic turns with variable aerodynamics. S. H. Maslen 1475
Improvement of missile and space vehicle accuracy by trajectory optimization. Cornelius T. Leondes and Ernst Volgenau 1609
Mars/Venus flyby missions with manned Mars landers. Robert L. Sohn (EN) 115
An optimal singular solution for the sounding rocket with altitude-dependent parameters. Kent Kresa (EN) 124
Use of lifting re-entry vehicles for synergetic maneuvers. Joseph P. Paine (EN) 698
Flight plans for injection of synchronous satellites. Alan M. Schneider, Edward B. Capan, and Joel J. Camiel (EN) 1399
Optimal aerodynamic-propulsive maneuvering for the orbital plane change of a space vehicle. Max Roessler (EN) 1678

Rocket exhaust plume radar attenuation and amplitude phase noise. L. D. Smoot and T. J. Seliga Jr..... 774

Space Vehicle Guidance and Navigation

An error analysis of navigation using inertial guidance and radar tracking. Karl L. Remmler and Richard T. Theobald..... 417
Filtering horizon-sensor measurements for orbital navigation. Robert J. Fitzgerald..... 428
Orientation of a rigid torque-free body by use of star transits. Charles B. Grosch..... 562
Analysis of Gemini 7-star sightings utilizing a space sextant in Gemini 6. T. B. Murtagh, C. R. Price, and H. E. Smith..... 567
Fixed-point simulation of onboard orbit determination. T. L. Gunckel II and J. C. Elsey..... 885
Saturn V guidance, navigation, and targeting. Daniel T. Martin, Russell F. Sievers, Robert M. O'Brien, and Alvin F. Rice..... 891
Autonomous orbital navigation by optical tracking of unknown landmarks. N. F. Toda and F. H. Schlee..... 1645
A position tracer for navigation in a manned satellite. Milo Wolff (EN)..... 399

Relationships between geographic and inertial coordinates. W. Gordon Heffron Jr. and Sheryl B. Watson (EN) ... 531
Approach and entry corridors for aerobraking at Mars and Venus. M. G. Boobar, E. M. Repic, and A. M. McDermott (EN) ... 682
Use of lifting re-entry vehicles for synergetic maneuvers. Joseph P. Paine (EN) ... 698
Finite-thrust explicit guidance law for nearly circular orbital rendezvous. Chong-Hung Zee ... 34
Re-entry guidance by threshold network storage of precomputed optimum commands. John C. Elsey, Herbert S. Fong, and Norman H. Meyers ... 443
Development of the iterative guidance mode with its application to various vehicles and missions. Doris C. Chandler and Isaac E. Smith ... 898
Comment on "Development of the iterative guidance mode with its application to various vehicles and missions." Donald J. Dobner (TC) ... 1681
Guidance requirements for an unmanned landing on Mars. F. B. Woestemeyer ... 1135
Recent developments in variable point guidance for space rendezvous and rescue. Alan M. Schneider, Edward B. Capen, and Joel J. Camiel ... 1453
Some aerospace differential games. R. E. Wong ... 1460
Equations of motion for a variable-mass inertially-guided system. Alan M. Schneider (EN) ... 1366
Development aspects of a miniature fluid counter. Robert A. Kantola ... 991

HEAT TRANSFER
(see also AERODYNAMIC HEATING)

Heat-transfer processes during ignition of solid propellant rockets. Donald S. Allan, E. Karl Bastress, and Kenneth A. Smith ... 95
Hypersonic viscous interaction theory for wedge wings. H. Mirels and W. S. Lewellen ... 492
Radiative vs ablative heat shield concepts for manned lifting entry vehicles. J. W. McCown and R. M. Davis ... 725
Boundary-layer attachment flow within a liquid hydrogen tank. R. A. Boudreaux and W. Tabakoff ... 1017
Flow phenomena and convective heat transfer in a conical supersonic nozzle. L. H. Back, P. F. Massier, and R. F. Cuffel ... 1040
Slug flow and film boiling of hydrogen. J. W. H. Chi ... 1329
Theoretical studies on the effects of blowing and suction in laminar separated regions. Warren C. Strahle ... 1352
Thermal diffusion separation of damping fluids in gyroscopes. Bertram Rockower (EN) ... 275
Effect of heat transfer in a converging-diverging nozzle. T. K. Bose (EN) ... 401
Effect of forward-facing jets on aerodynamic characteristics of blunt configurations at Mach 6. J. Wayne Keyes and Jerry N. Hefner (EN) ... 533
An improved finite-difference method for heat-transfer calculations. Sidney Gross (EN) ... 538
Thermal design of molten carbonate fuel cells. D. Gidaspow, B. S. Baker, and T. Schmidt (EN) ... 690
Results from short-duration altitude-chamber techniques for simulating rocket base heating problems. H. B. Wilson Jr. (EN) ... 693
Effects of condenser parameters on heat pipe optimization. D. K. Anand, A. Z. Dybbs, and R. E. Jenkins (EN) ... 695
Normal shock location in adiabatic constant-area ducts with friction. Leighton E. Sissom (EN) ... 810
Effect of nose bluntness on the hypersonic unsteady aerodynamics of an ablating re-entry body. L. E. Ericsson (EN) ... 811
A thermodynamic system for zero-g venting, storage, and transfer of cryogenic propellants. Donald E. Hill and Richard J. Salvinski (EN) ... 955
Heat-pipe performance in a zero gravity field. J. E. Deverall, E. W. Salmi, and R. J. Knapp (EN) ... 1556
Turbulent separation associated with axisymmetric flared bodies. Theodore J. Goldberg (EN) ... 1551
Comments on "Application of Biot's variational method to convective heating of a slab." C. L. Gupta (TC) ... 831
Reply by author to C. L. Gupta's comment. Hugh N. Chu (TC) ... 831
Solar incidence factors for thermal analysis of imperfectly collimated radiation in solar simulators. R. P. Bobco and C. P. Stensgaard Jr. ... 236
Satellite thermal simulation by a hybrid computer. David Berman ... 243
Analytical solution of the "known-heat-load" space radiator problem. Lynn Darnell Russell and Alan J. Chapman ... 311
Analyses and tests of thermal scale models of a simulated spacecraft. R. K. Thompson, V. G. Klockzien, and G. E. Dufoe ... 486
Recent gains in solar concentrator technology. Atwood R. Heath Jr. and Edward L. Hoffman ... 621
Absorption of thermal radiation in the transparent wall of a nuclear light bulb rocket engine. George H. McLafferty ... 758
Laboratory and flight test program to evaluate the space stability of highly specular reflective surfaces. K. N. Marshall, N. J. Douglas, H. E. Pollard, and R. E. Rolling ... 912
Local radiation equilibrium temperatures in semigray enclosures. R. P. Bobco, G. E. Allen, and P. W. Othmer ... 1076
Explanation of the anomalous spin behavior of satellites with long, flexible antennae. B. Etkin and P. C. Hughes ... 1139
Status of basic shock-layer radiation information for inner-planet atmospheric entry. Fred Wolf and Joseph M. Spiegel ... 1166
A thermophototropic model for spacecraft thermal control. H. Levin, C. C. Berggren, and V. R. Honnold ... 1190
An analysis of transient temperatures in gamma-heated materials. N. K. Rumpf and J. O. Mingle ... 1195
Multichannel radiometer measurement of solar irradiance. A. J. Drummond, J. R. Hickey, W. J. Scholes, and E. G. Laue ... 1200
Calorimetric absorptance measurements of thermal-control coatings between room and cryogenic temperatures. W. F. Schmidt and R. W. Olenick ... 1495
Optimization of base thermal protection system for advanced Saturn II boosters employing strap-on solid-propellant motors. M. B. Hammond, B. K. Adler, and K. D. Korkan ... 1505
Synergistic and accelerated testing effects on space thermal-control materials. J. D. Pinson and J. A. Wiebelt ... 1511
Space environment simulator for materials studies at NASA Ames. Bernard E. Cunningham and Robert E. Eddy (EN) ... 280
Thermal equilibration. P. J. Schneider (EN) ... 402
Results from short-duration altitude-chamber techniques for simulating rocket base heating problems. H. B. Wilson Jr. (EN) ... 693
Char reflectances and planetary entry heat shields. Robert G. Nagler (EN) ... 798
Application of Sokolov's method to integral equations of radiant interchange. A. L. Crosbie and R. Viskanta (EN) ... 947
Technique to evaluate surface contamination due to rocket exhaust impingement. M. H. Hauptman and H. Fine (EN) ... 959
Radioactive dispersions for radioactive ablation sensors. Robert A. Florentine, J. F. Schneider, and D. S. Gicking (EN) ... 1083
An intensity and uniformity monitor for solar simulators. B. A. McCullough, B. E. Wood, J. P. Dawson, and R. C. Birkebak (EN) ... 1114
Transient thermal response of multiple-foil high-temperature radiation shields. Leon Bledjian (EN) ... 1397
Comments on Al_2O_3 temperature for "Radiant heat transfer to an enclosure from two-phase flows." Donald G. Miller (TC) ... 288
Thermal contact resistance across elastically deformed spheres. M. Michael Yovanovich (EN) ... 119
Comments on "An improved finite-difference method for heat-transfer calculation." R. K. McMordie and L. W. Mordock (TC) ... 1567
Reply by author to R. K. McMordie and L. W. Mordock. Sidney Gross (TC) ... 1568

MANAGEMENT

A method for measuring launch-operations progress developed for the Surveyor program. Donald Stearns (EN) ... 405

MATERIALS AND STRUCTURAL COMPOSITES

Design considerations in material selection for rocket-motor cases. Charles W. Bert and Walter S. Hyler (SA) ... 705
Surface blistering of metals due to low energy hydrogen bombardment. Donald L. Anderson and Richard G. Dahms ... 364
Large stiffened cylinder weight—cost comparisons between Be-38% Al and other materials. Henry H. Armstrong, A. Bruce Burns, and Ron G. Crawford ... 370
Optimum cylinders with contrasting materials and various ring/stringer configurations. A. Bruce Burns ... 375
New metal-metal composite materials. LeRoy W. Davis and Wayne R. Morgan ... 386
Sliding electrical contact materials for use in ultrahigh vacuum. Francis J. Clauss and Marshall K. Kingery ... 480
High-temperature testing and evaluation of graphite helical-screw expanders and compressors. W. M. Wells, D. W. Hanner, J. L. McElroy, and E. Robinson ... 761
Char reflectances and planetary entry heat shields. Robert G. Nagler (EN) ... 798
Repair of a zinc oxide-potassium silicate thermal control paint. Stanley T. Peters (EN) ... 1390
Superlight ablative systems for Mars lander thermal protection. Eric L. Strauss ... 1304
Development of airframe heat protection for a high-performance sounding rocket. David K. Overmier ... 1500
Thermoelastic stress concentrations. Herbert Becker and Frederick Bird (EN) ... 1091
Local buckling strength of fiberglass-wound maraging-steel cylinders. J. E. Bower ... 54
Radiative vs ablative heat shield concepts for manned lifting entry vehicles. J. W. McCown and R. M. Davis ... 725
A comparative design analysis of three configurational families for manned earth entry at hyperbolic speeds. D. J. Shapland and W. F. Munroe ... 732
Filament-overwrapped metallic cylindrical pressure vessels. Robert H. Johns and Albert Kaufman ... 872
A thermophototropic model for spacecraft thermal control. H. Levin, C. C. Berggren, and V. R. Honnold ... 1190
Application of parameter management to roll rate control in the ballistic missile target system. Louis M. Goldberg ... 1243

Optimization of base thermal protection system for advanced Saturn II boosters employing strap-on solid-propellant motors. M. B. Hammond, B. K. Adler, and K. D. Korkan ... 1505
Space evacuation of NRC-2 insulation for liquid hydrogen tankage. R. F. Crawford, R. G. Hannah, and C. D. Nevins ... 1598
Nonhomogeneous impact attenuator for spherical landing capsule. Gerald J. Cloutier (EN) ... 1084
Fin structural design for high-performance sounding rockets. H. G. Sevier (EN) ... 1267
Behavior of laminated orthotropic viscoelastic plates. Stanley B. Dong (EN) ... 1385
Transient thermal response of multiple-foil high-temperature radiation shields. Leon Bledjian (EN) ... 1397
Transmission of isotropically incident electrons through spacecraft hull materials. Walter K. Stromquist, H. P. Sleeper Jr., and O. L. McDermed ... 106
An analysis of transient temperatures in gamma-heated materials. N. K. Rumpf and J. O. Mingle ... 1195
Synergistic and accelerated testing effects on space thermal-control materials. J. D. Pinson and J. A. Wiebelt ... 1511

MISSIONS AND MISSION ANALYSIS

A survey of ballistic Mars-mission profiles. Vernon A. Lee and Sam W. Wilson Jr. (SA) ... 129
Integrated orbital logistics support. Robert H. Lea ... 1010
The two-stage sounding rocket problem. Russell D. Shaver ... 1310
Development of the Aerobee 350 sounding rocket. John H. Lane and Clifford P. Chalfant ... 1316
Improvement of missile and space vehicle accuracy by trajectory optimization. Cornelius T. Leondes and Ernst Volgenau ... 1609
A method for measuring launch-operations progress development for the Surveyor program. Donald Stearns (EN) ... 405
Statisical variations in performance of rocket engines. Mario W. Cardullo (EN) ... 1103
Liquid propellant rocket engines: Their status and future. S. F. Iacobellis, V. R. Larson, and R. V. Burry (SA) ... 1569
A new concept in artificial gravity systems. Charles A. Lindley ... 3
Project EGRESS. John P. Dunn and Patrick C. Carroll ... 9
Effect of man's motion on the attitude of a satellite. Corrado R. Poli 15
Low-thrust propulsion for the MORL. Milton Goodman ... 183
Satellite thermal simulation by a hybrid computer. David Berman ... 243
Cross-track sustaining requirements for a 24-hr satellite. B. H. Billik 297
Filtering horizon-sensor measurements for orbital navigation. Robert J. Fitzgerald ... 423
Analysis of Gemini 7-star sightings utilizing a space sextant in Gemini 6. T. B. Murtagh, C. R. Price, and H. E. Smith ... 567
Implications of maneuvering-range constraints on lifting-vehicle design. Johann Lau ... 639
Precision limb profiles for navigation and research. Milo Wolff ... 978
Statistical properties of orbit perturbations induced by the earth's anomalous gravity. Robert H. Gersten, Roger C. Gore, and Norman. S. Hall ... 1145
Determination of the Pacific equilibrium point for a stationary orbit. Richard E. Balsam and Bernard M. Anzel ... 1289
Recent developments in variable point guidance for space rendezvous and rescue. Alan M. Schneider Edward B. Capen, and Joel J. Camiel ... 1453
Some aerospace differential games. R. E. Wong ... 1460
Synergetic turns with variable aerodynamics. S. H. Maslen ... 1475
Stabilization system analysis and performance of the GEOS-A gravity-gradient satellite (Explorer XXIX). Vincent L. Pisicane, Peter P. Pardoe, and B. Joy Hook ... 1623
A synthetic aperture approach to space-based radio telescopes. Francis W. French, Albert K. Rodman, and G. Richard Huguenin ... 1650
Lunar eclipse of a satellite of the earth. P. R. Escobal and R. A. Robertson (EN) ... 538
Manned meteorology experiments. Glenn A. Cato (EN) ... 1094
Analytic determination of perigee passage using Lambert's theorem. Kenneth B. Bley (EN) ... 1101
Effect of heating restraints on synergetic maneuver performance. John S. Clauss Jr. and R. D. Yeatman (EN) ... 1107
Application of a two-body analysis of position or velocity error propagation. Robert B. Merrick (EN) ... 1109
Importance of recovery-site location in determining entry vehicle requirements for future missions. Paul F. Holloway (EN) ... 1262
Drag coefficients for tumbling satellites. Lee H. Sentman and Stanford E. Neice (EN) ... 1270
Aids in establishing design criteria for satellite-borne optical systems. S. S. Verner (EN) ... 1381
High-altitude hypersonic flow effects on the lateral range capability of entry vehicles. E. Brian Pritchard and Paul F. Holloway (EN) 1395
Flight plans for injection of synchronous satellites. Alan M. Schneider, Edward B. Capen, and Joel J. Camiel (EN) ... 1399
Optimal aerodynamic-propulsive maneuvering for the orbital plane change of a space vehicle. Max Roessler (EN) ... 1678
Comment on "Relative motion of a body about an orbiting satellite" Stephen H. Sandler (TC) ... 1120
Accuracy of determining the state of a lunar satellite and the lunar gravitational field. Robert H. Tolson and Harold R. Compton ... 26
Colloidal ion power converter and thruster for lunar and planetary missions. A. Lucile Cox and M. Lee McDaniel ... 86
Venus-swingby mission mode and its role in the manned exploration of Mars. Rollin W. Gillespie and Stanley Ross ... 170
Design of a solar-electric propulsion system for interplanetary spacecraft. J. H. Molitor, D. Berman, R. L. Seliger, and R. N. Olson ... 176
Dynamic analysis of a lunar-surface vehicle. E. F. Styer and D. H. Merchant ... 208
Sensitivity of manned planetary spacecraft design to radiation uncertainties. Raymond C. Savin, Jerry M. Deerwester, and Alfred C. Mascy ... 249
Trajectory design for the Mariner-Mars 1964 mission. Dennis A. Tito ... 289
Study of electric propulsion for manned Mars missions. R. V. Ragsac ... 462
Radio occultation investigations of the atmosphere of Mars. Arvydas Kliore and Dennis A. Tito ... 578
Power and weight requirements for ion engine systems as functions of mission requirements. T. R. Shukay ... 615
An evolutionary program for manned interplanetary exploration. M. W. Jack Bell ... 625
Fixed-point simulation of onboard orbit determination. T. L. Gunckel II and J. C. Elsey ... 885
Saturn V guidance, navigation, and targeting. Daniel T. Martin, Russell F. Sievers, Robert M. O'Brien, and Alvin F. Rice ... 891
Systematic comparison of Venus swingby mode with standard mode of Mars round trips. J. M. Deerwester and S. M. D'Haem ... 904
An analysis of minimum heat trajectories for entry at hyperbolic speeds. Rodney C. Wingrove ... 1048
Major system design problems for deep space probes. William J. Dixon ... 1121
Trajectory modes for manned and unmanned missions to Mercury: 1980–2000. Larry A. Manning ... 1128
Guidance requirements for an unmanned landing on Mars. F. B. Woestemeyer ... 1135
A radio occultation experiment to probe the atmosphere of Venus. Arvydas Kliore, Dennis A. Tito, Dan L. Cain, and Gerald S. Levy ... 1339
Definition of a science subsystem for a Jupiter flyby mission. B. A. Sodek and J. C. Redmond ... 1658
Mars/Venus flyby missions with manned Mars landers. Robert L. Sohn (EN) ... 115
Theoretical investigation of entry vehicle stability in the Mars atmosphere. C. L. Kyriss and H. Rie (EN) ... 272
Approach and entry corridors for aerobraking at Mars and Venus. M. G. Boobar, E. M. Repic, and A. M. McDermott (EN) ... 682
The lunar pogo stick. H. S. Seifert (EN) ... 941
Solar system escape circle. Allen Jones (EN) ... 957
Comment on "Study of electric propulsion for manned Mars missions." Charles L. Zola (TC) ... 1405
Reply by author to C. L. Zola. R. V. Ragsac (TC) ... 1406

POWER SYSTEMS

A review of batteries and fuel cells for space power systems. R. C. Shair, S. R. Lerner, P. A. Joyner, and G. E. Evans (SA) ... 833
Photovoltaic power. P. Rappaport (SA) ... 838
Magnetohydrodynamic power systems. David G. Elliott (SA) ... 842
Thermionic space power systems review. R. A. Becker (SA) ... 847
Design of a solar-electric propulsion system for interplanetary spacecraft. J. H. Molitor, D. Berman, R. L. Seliger, and R. N. Olson ... 176
Solar-electric propulsion system performance for a close solar probe mission. William C. Strack ... 469
Laboratory and flight test program to evaluate the space stability of highly specular reflective surfaces. K. N. Marshall, N. J. Douglas, H. E. Pollard, and R. E. Rolling ... 912
Photovoltaic electric power system concepts for solar probes. Sidney Gross ... 1173
Drift-field solar cells on silicon web. K. S. Tarneja, R. K. Riel, J. M. Hicks, and R. V. Babcock ... 1664
Recent gains in solar concentrator technology. Atwood R. Heath Jr. and Edward L. Hoffman ... 621
Plasma separator thruster. B. A. Free and W. R. Mickelsen ... 1282
Potential of low-power thermionic devices for terrestrial applications. F. T. Princiotta and T. S. Bustard (EN) ... 1086
Auxiliary and primary electric propulsion, present and future. William R. Mickelsen (SA) ... 1409
Liquid-phase compression gas turbine for space power applications. Gianfranco Angelino ... 188
Perfect thermodynamic vapor concept and application to the analysis of power conversion cycles. A. G. Hammitt and R. A. Cecil ... 195
Sliding electrical contact materials for use in ultrahigh vacuum. Francis J. Clauss and Marshall K. Kingery ... 480
High-temperature testing and evaluation of graphite helical-screw expanders and compressors. W. M. Wells, D. W. Hanner, J. L. McElroy, and E. Robinson ... 761
Alkali-metal, Rankine-cycle power systems for electric propulsion. Morris A. Zipkin ... 852
A liquid metal Rankine topping cycle for a steam power plant. Robert D. Gruntz ... 859
Factors influencing electro-fluid dynamic power generation. Harold E. Brandmaier and T. Herbert Dimmock ... 961
Performance of space-power liquid metal MHD cycles utilizing a two-phase flow generator. Michael Petrick and John J. Roberts ... 967
Thermodynamic analysis of Stirling engines. Theodor Finkelstein ... 1184
Comment on "Jet compression for closed-cycle magnetoplasmadynamic electric power generation." Gianfranco Angelino (TC) ... 1564
Reply by author to G. Angelino. C. Shih (TC) ... 1567
Bipolar nickel-cadmium cells for high-energy pulses. Harvey N. Seiger, Arthur E. Lyall, and Steven Charlip ... 974
A high energy density zinc/oxygen battery system. S. M. Chodosh, E. G. Katsoulis, and M. G. Rosansky (EN) ... 680
Thermal design of molten carbonate fuel cells. D. Gidaspow, B. S. Baker, and T. Schmidt (EN) ... 690
Electrodeless magnetogasdynamic power during entry. S. Kranc, Robert W. Porter, and Ali Bulent Cambel (EN) ... 813

PROPULSION

Airbreathing Propulsion

Arc length of a two-dimensional isentropic compression surface. T. A. Sedgwick and L. L. Jessie (EN) ... 1373
Pressure recovery in hypersonic engine test facilities. James L. Grunnet and Marion L. Laster ... 643
Inlet flowfield analysis for high Mach number applications. John W. Benefield and Leroy M. Hair ... 650
An experimental and comparative study of jet penetration in supersonic flow. Richard C. Orth and John A. Funk ... 1236
Mean droplet size for cross-stream water injection into a Mach 8 air flow. Paul Gooderum, Dennis Bushnell, and Jarrett Huffman (EN) ... 534
Development of a facility for supersonic combustion simulation. Norman E. Scaggs and Robert G. Dunn (EN) ... 803
Performance comparison of gun-launched scramjets for various fuels. Nasim F. Amin and Sannu Mölder (EN) ... 1089

Combustion and Internal Ballistics

Influence of embedded metal fibers on solid-propellant burning rate. L. H. Caveny and R. L. Glick ... 79
Heat-transfer processes during ignition of solid propellant rockets. Donald S. Allan, E. Karl Gastress, and Kenneth A. Smith ... 95
Internal ballistic considerations in hybrid rocket design. C. E. Wooldridge and R. J. Muzzy ... 255
Combustion characteristics of condensed-phase hydrazine-type fuels with nitrogen tetroxide. Theodore Christos, Yael Miron, Harry James, and Henry Perlee ... 1224
Monitoring the combustion process in large engines. J. G. Sotter and R. M. Clayton (EN) ... 702
A criterion for space capsule fire hazard minimization. Robert F. McAlevy III and Richard S. Magee (EN) ... 1390
Effect of elastic case on stability of radial modes in solid propellant rockets. J. D. Achenbach and C.-T. Sun ... 214
Thrust magnitude and restart control of solid motors by injection of hypergolic fluids. J. H. Bonin, R. L. Coates, and N. S. Cohen ... 354
Internal ballistics of slotted-tube, solid-propellant rocket motors. R. L. Glick, L. H. Caveny, and J. L. Thurman ... 525
Igniter performance in solid-propellant rocket motors. David M. Adams ... 1024
Effect of specific-heat ratio on mass flow for swirling nozzle flow. R. L. Glick and M. S. Kilgore (EN) ... 1098
Internal ballistics of the solid-propellant rocket motor. V. K. Srivastava (EN) ... 1549

Electric Propulsion

Auxiliary and primary electric propulsion, present and future. William R. Mickelsen (SA) ... 1409
Electric propulsion activities outside of the United States. William J. Guman (SA) ... 1424
Low-thrust propulsion for the MORL. Milton Goodman ... 183
Study of electric propulsion for manned Mars missions. R. V. Ragsac ... 462
Solar-electric propulsion system performance for a close solar probe mission. William C. Strack ... 469
Comparison of arcjet exhaust velocity with the propagation velocity of random light fluctuations. Donald W. Esker (EN) ... 685
Comment on "Study of electric propulsion for manned Mars missions." Charles L. Zola (TC) ... 1405
Reply by author to C. L. Zola. R. V. Ragsac (TC) ... 1406
Colloidal ion power converter and thruster for lunar and planetary missions. A. Lucile Cox and M. Lee McDaniel ... 86
Design of a solar-electric propulsion system for interplanetary spacecraft. J. H. Molitor, D. Berman, R. L. Seliger, and R. N. Olson ... 176
Development of a regenerative collector target system for ion engine testing. J. D. Trolinger and J. I. Shipp ... 457
Electron-bombardment thrusters using liquid-mercury cathodes. H. J. King, W. O. Eckhardt, J. W. Ward, and R. C. Knechtli ... 599
Development and testing of a lightweight flight prototype ion engine system. H. J. King, J. H. Molitor, D. G. Kovar, and W. J. Muldoon ... 603
Experimental performance of a low-thrust, divergent-flow, contact-ionisation electrostatic thruster. John F. Staggs and Walter C. Lathem ... 610
Power and weight requirements for ion engine systems as functions of mission requirements. T. R. Shukay ... 615
Cesium electron-bombardment ion microthrusters. G. Sohl, V. V. Fosnight, S. J. Goldner, and R. C. Speiser ... 1180
Computer design of an electrostatic colloid thruster. Derek A. Gordon (EN) ... 1370
Radially slotted grids for a Kaufman ion thruster. Bruce A. Banks and Edward A. Richley (EN) ... 1562

Propellants and Propellant Systems

Capillary hydrostatics in annular tanks. J. G. Seebold, M. P. Hollister, and H. M. Satterlee ... 101
James R. Melcher and Mathew Hurwitz ... 864
Boundary-layer attachment flow within a liquid hydrogen tank. R. A. Boudreaux and W. Tabakoff ... 1017
Slug flow and film boiling of hydrogen. J. W. H. Chi ... 1329
Space evacuation of NRC-2 insulation for liquid hydrogen tankage. R. F. Crawford, R. G. Hannah, and C. D. Nevins ... 1598
An active thermal insulator technique for cryogenic storage. Jacob B. Romero (EN) ... 1116
Influence of embedded metal fibers on solid-propellant burning rate. L. H. Caveny and R. L. Glick ... 79
Surveyor vernier engine fuel blend—A constrained optimization. J. R. Wrobel and Chester Grelecki ... 347
Igniter performance in solid-propellant rocket motors. David M. Adams ... 1024
Combustion characteristics of condensed-phase hydrazine-type fuels with nitrogen tetroxide. Theodore Christos, Yael Miron, Harry James, and Henry Perlee ... 1224
Improved solid propellants for moderate-temperature gas generators. E. S. Sutton, E. J. Pacanowsky, and S. F. Sarner ... 1543
Viscosity correlation for para-hydrogen in the gaseous and liquid states. Barry M. Rosenbaum and George Thodos (EN) ... 122
A thermodynamic system for zero-g venting, storage, and transfer of cryogenic propellants. Donald E. Hill and Richard J. Salvinski (EN) ... 955
Performance comparison of gun-launched scramjets for various fuels. Nasim F. Amin and Sannu Mölder (EN) ... 1089
Development of the Surveyor vernier propulsion system. M. Edmund Ellion, H. DiCristina, A. R. Maffei, and A. Briglio Jr. ... 339
Thrust magnitude and restart control of solid motors by injection of hypergolic fluids. J. H. Bonin, R. L. Coates, and N. S. Cohen ... 354
Mariner IV midcourse propulsion system impulse and accuracy prediction. James H. Kelley ... 1217
Comparison of arcjet exhaust velocity with the propagation velocity of random light fluctuations. Donald W. Esker (EN) ... 685
Monitoring the combustion process in large engines. J. G. Sotter and R. M. Clayton (EN) ... 702
Instrumentation response requirements for solid-propellant combustion termination systems. R. S. Brown (EN) ... 949

Rockets, Auxiliary

Development of the Surveyor vernier propulsion system. M. Edmund Ellion, H. DiCristina, A. R. Maffei, and A. Briglio Jr. ... 339
Surveyor vernier engine fuel blend—A constrained optimization. J. R. Wrobel and Chester Grelecki ... 347
Dynamic performance of surveyor throttleable engine when propellants contain dissolved helium. C. E. McDermott, R. R. Breshears, and J. McCafferty ... 669
Dynamic performance of low-thrust, cold-gas reaction jets in a vacuum. H. Greer and D. J. Griep ... 983
Mariner IV midcourse propulsion system impulse and accuracy prediction. James H. Kelley ... 1217
Improved solid propellants for moderate-temperature gas generators. E. S. Sutton, E. J. Pacanowsky, and S. F. Sarner ... 1543
Small liquid propulsion systems testing in a space environment simulator. T. E. Mouritsen and C. E. Sullivan (EN) ... 687
Comments on "A review of microrocket technology: 10^{-6} to 1 lbf thrust." Donald F. Reeves (TC) ... 830

Rockets, Liquid

Liquid propellant rocket engines: Their status and future. S. F. Iacobellis, V. R. Larson, and R. V. Burry (SA) ... 1569
Mixture ratio distribution— Its impact on rocket thrust chamber performance. J. L. Pieper, L. E. Dean, and R. S. Valentine ... 786
Effects of chamber energy release efficiency upon nozzle performance. J. L. Pieper, L. E. Dean, and R. S. Valentine (EN) ... 700
Criteria for optimum propellant mixing in impinging-jet injection elements. Robert W. Riebling (EN) ... 817
Statistical variations in performance of rocket engines. Mario W. Cardullo (EN) ... 1103
Surveyor vernier engine fuel blend—A constrained optimization. J. R. Wrobel and Chester Grelecki ... 347
Environmental effects upon rocket injector/chamber compatability. T. E. Conn, J. N. Hester, and R. S. Valentine ... 1581
Simplified thermal fatigue analysis for liquid rocket combustion chambers. D. J. Kuyper and H. L. Burge (EN) ... 126
Honeycomb engine—A compact rocket engine concept. Heinz Mueller (EN) ... 800
Dynamic performance of surveyor throttleable engine when propellants contain dissolved helium. C. E. McDermott, R. R. Breshears, and J. McCafferty ... 669
Flow phenomena and convective heat transfer in a conical supersonic nozzle. L. H. Back, P. F. Massier, and R. F. Cuffel ... 1040
A thermodynamic system for zero-g venting, storage, and transfer of cryogenic propellants. Donald E. Hill and Richard J. Salvinski (EN) ... 955
Optimization of conical thrust nozzles. M. Peter Scofield and Joe D. Hoffman (EN) ... 1547

Rockets, Nuclear

Cooldown requirements for nuclear rocket missions. Charles Fenstermacher and Donald T. Oakley (EN) 117
Absorption of thermal radiation in the transparent wall of a nuclear light bulb rocket engine. George H. McLafferty 758
Gas-core nuclear rocket engine. Edward E. Duke and William J. Houghton 1592

Rockets, Solid (Includes Hybrid)

Influence of embedded metal fibers on solid-propellant burning rate. L. H. Caveny and R. L. Glick 79
Heat-transfer processes during ignition of solid propellant rockets. Donald S. Allan, E. Karl Bastress, and Kenneth A. Smith 95
Effect of elastic case on stability of radial modes in solid propellant rockets. J. D. Achenbach and C.-T. Sun 214
Thrust magnitude and restart control of solid motors by injection of hypergolic fluids. J. H. Bonin, R. L. Coates, and N. S. Cohen 354
Wind-tunnel simulation of rocket vehicles in flight with two-phase-flow rocket plumes. Richard H. Adams 518
Internal ballistics of slotted-tube, solid-propellant rocket motors. R. L. Glick, L. H. Caveny, and J. L. Thurman 525
Heat-sterilizable solid propellant motor designs for interplanetary missions. W. G. Andrews and T. J. Kirschner 663
Rocket exhaust plume radar attenuation and amplitude/phase noise. L. D. Smoot and T. J. Seliga Jr. 774
Effects of exhausts from aluminized solid propellants on launch facilities. Edward J. Lays and Eugene A. Darrow 934
Igniter performance in solid-propellant rocket motors. David M. Adams 1024
Analysis of flame effects on measured electromagnetic propagation data. F. A. Vicente, E. C. Taylor, and R. W. Phelps 1069
Monitoring the combustion process in large engines. J. G. Sotter and R. M. Clayton (EN) 702
A frangible sounding rocket vehicle design. D. D. Dunfee and G. K. Oss (EN) 823
Instrumentation response requirements for solid-propellant combustion termination systems. R. S. Brown (EN) 949
Effect of specific-heat ratio on mass flow for swirling nozzle flow. R. L. Glick and M. S. Kilgore (EN) 1098
On swirling nozzle flows. W. S. King (TC) 1404
Internal ballistic considerations in hybrid rocket design. C. E. Wooldridge and R. J. Muzzy 255

STRUCTURES AND STRUCTURAL DYNAMICS (see also VEHICLE DYNAMICS)

Structural Design and Fabrication

Design considerations in material selection for rocket-motor cases. Charles W. Bert and Walter S. Hyler (SA) 705
Aeroelastic instability caused by slender payloads. Lars Eric Ericsson 65
High-speed analysis of wind-induced dynamic loads on vertically rising vehicles. Chris J. Van Der Maas 583
Optimum thickness transitions for cylindrical pressure vessels with hemispherical heads. E. Y. W. Tsui and A. Bruce Burns 716
Transient pressures caused by rocket start and shutdown in ducted launchers. J. E. Broadwell and C. N. Tsu 1323
Use of wind shears in the design of aerospace vehicles. Robert S. Ryan, James R. Scoggins, and Alberta King 1526
An objective wind criterion for structural design of launch vehicles. Jerold M. Bidwell (EN) 1278
Effects of solar environment and aerodynamic drag on structural booms in space. S. Z. Fixler 315
Large stiffened cylinder weight—cost comparisons between Be-38% Al and other materials. Henry H. Armstrong, A. Bruce Burns, and Ron G. Crawford 370
Optimum cylinders with contrasting materials and various ring/stringer configurations. A. Bruce Burns 375
Tension string structure for planetary entry vehicles. John A. Alai 720
Filament-overwrapped metallic cylindrical pressure vessels. Robert H. Johns and Albert Kaufman 872
Thermoelastic stress concentrations. Herbert Becker and Frederick Bird (EN) 1091
Local buckling strength of fiberglass-wound maraging-steel cylinders. J. E. Bower 54
Predicting structural reliability for design decisions. Ralph E. Blake 392
Recent gains in solar concentrator technology. Atwood R. Heath Jr. and Edward L. Hoffman 621
High-temperature testing and evaluation of graphite helical-screw expanders and compressors. W. M. Wells, D. W. Hanner, J. L. McElroy, and E. Robinson 761
Application of parameter management to roll rate control in the ballistic missile target system. Louis M. Goldberg 1243
An application of parameter optimization to hydraulic servo design. G. G. Evans, H. E. Vigour, and F. J. Ellert 1483
Simplified thermal fatigue analysis for liquid rocket combustion chambers. D. J. Kuyper and H. L. Burge (EN) 126

Structural Dynamics

Local buckling strength of fiberglass-wound maraging-steel cylinders. J. E. Bower 54
Structural dynamics aspects of the Gemini program. J. A. Callahan 58
Model tests for structural response of Apollo command module to water impact. Wilfred E. Baker and Peter S. Westine 201
Dynamic analysis of a lunar-surface vehicle. E. F. Styer and D. H. Merchant 208
Effect of elastic case on stability of radial modes in solid propellant rockets. J. D. Achenbach and C.-T. Sun 214
Predicting structural reliability for design decisions. Ralph E. Blake 392
An adaptive tracking filter for bending-mode stabilization. Randall Gaylor, Robert L. Schaeperkoetter, and David C. Cunningham 573
MISDAS—A mechanical impact system design for Apollo-type spacecraft. Allen I. Bernstein and Alberto S. Musicman 740
Attitude control of a flexible, spinning, toroidal manned space station. William B. Gevarter 878
Free flight simulated on ground with the Apollo Saturn V space vehicle. George L. von Pragenau 1211
Longitudinal vibration of a model space vehicle propellant tank. Daniel D. Kana and John F. Gormley 1585
Power spectra measurements for spacecraft vibration data. Allan G. Piersol 1613
Modes of vibration of conical frustum shells with free ends. John S. Mixson (EN) 414
A material hysteresis model for transient dynamic analysis. Hassel Charles Schjelderup (EN) 541
A comparison of flexible and rigid ring baffles for slosh suppression. Luis R. Garza and Franklin T. Dodge (EN) 805
Protecting precision laboratory equipment from vibration environment. Serge Kunica (EN) 944
Mechanical model for longitudinally excited sloshing motion. Helmut F. Bauer and Jose Villanueva (EN) 1376
Behavior of laminated orthotropic viscoelastic plates. Stanley B. Dong (EN) 1385
Statistics of rigid body moment of inertia computation. Jon D. Collins and William T. Thomson (EN) 1673
Comment on "Dynamic equations for connected rigid bodies." Robert E. Roberson (TC) 1564
Reply by author to R. E. Roberson. S. H. Sandler (TC) 1564

Vehicle Structures

Design considerations in material selection for rocket-motor cases. Charles W. Bert and Walter S. Hyler (SA) 705
A meteor shield effectiveness analysis. D. L. Pope (EN) 1559
Optimum thickness transitions for cylindrical pressure vessels with hemispherical heads. E. Y. W. Tsui and A. Bruce Burns 716
Free flight simulated on ground with the Apollo Saturn V space vehicle. George L. von Pragenau 1211
Transient pressures caused by rocket start and shutdown in ducted launchers. J. E. Broadwell and C. N. Tsu 1323
Optimization of base thermal protection system for advanced Saturn II boosters employing strap-on solid-propellant motors. M. B. Hammond, B. K. Adler, and K. D. Korkan 1505
A material hysteresis model for transient dynamic analysis. Hassel Charles Schjelderup (EN) 541
Fin structural design for high-performance sounding rockets. H. G. Sevier (EN) 1267
Structural dynamics aspects of the Gemini program. J. A. Callahan 58
Transmission of isotropically incident electrons through spacecraft hull materials. Walter K. Stromquist, H. P. Sleeper Jr., and O. L. McDermed 106
Model tests for structural response of Apollo command module to water impact. Wilfred E. Baker and Peter S. Westine 201
An evolutionary program for manned interplanetary exploration. M. W. Jack Bell 625
Tension string structure for planetary entry vehicles. John A. Alai 720
MISDAS—A mechanical impact system design for Apollo-type spacecraft. Allen I. Bernstein and Alberto S. Musicman 740
Nonhomogeneous impact attenuator for spherical landing capsule. Gerald J. Cloutier (EN) 1084
Satellite thermal simulation by a hybrid computer. David Berman 243
Analytical solution of the "known-heat-load" space radiator problem. Lynn Darnell Russell and Alan J. Chapman 311
Surface blistering of metals due to low energy hydrogen bombardment. Donald L. Anderson and Richard G. Dahms 364
A thermophototropic model for spacecraft thermal control. H. Levin, C. C. Berggren, and V. R. Honnold 1190
Multichannel radiometer measurement of solar irradiance. A. J. Drummond, J. R. Hickey, W. J. Scholes, and E. G. Laue 1200
Calorimetric absorptance measurements of thermal-control coatings between room and cryogenic temperatures. W. F. Schmidt and R. W. Olenick 1495
Synergistic and accelerated testing effects on space thermal-control materials. J. D. Pinson and J. A. Wiebelt 1511
Surveyor white paint degradation. W. A. Hagemeyer Jr. (EN) 828
An intensity and uniformity monitor for solar simulators. B. A. McCullough, B. E. Wood, J. P. Dawson, and R. C. Birkebak (EN) 1114
An active thermal insulator technique for cryogenic storage. Jacob B. Romero (EN) 1116
Repair of a zinc oxide-potassium silicate thermal control paint. Stanley T. Peters (EN) 1390
Heat-pipe performance in a zero gravity field. J. E. Deverall, E. W. Salmi, and R. J. Knapp (EN) 1556
The steady-state thermal design of space radiators. Louis Lopez and Alan J. Chapman (EN) 1675

SYSTEM EFFECTIVENESS AND SAFETY

A comprehensive reliability analysis of redundant systems. Robert S. Pringle and Philip M. Gresho 631
Implementation of advanced simulation techniques for predicting the Saturn V launch vehicle system behavior. J. E. Snyder, E. R. Bennich, and Y. H. Lindsey 998
Integrated orbital logistics support. Robert H. Lea 1010
An ultrareliable sensing system for vehicles with limited sparing capability. R. Weiss and I. Nathan 1151
Fault tree analysis as applied to missile systems. Robert F. Sellars (EN) 1099
Prediction of availability to launch-on-time. R. A. Holtz and D. R. Jackson (EN) 1269
Liquid propellant rocket engines: Their status and future. S. F. Iacobellis, V. R. Larson, and R. V. Burry (SA) 1569
Predicting structural reliability for design decisions. Ralph E. Blake 392
Safety assurance for extended manned missions. Roy B. Carpenter Jr. 448
Ignition of hypergolic propellants in a simulated space environment. Raymond L. Chuan and Paul C. Wilber (EN) 282
A frangible sounding rocket vehicle design. D. D. Dunfee and G. K. Oss (EN) 823

SYSTEMS ENGINEERING

Launch Vehicles and Missiles

Development of the iterative guidance mode with its application to various vehicles and missions. Doris C. Chandler and Isaac E. Smith 898
Comment on "Development of the iterative guidance mode with its application to various vehicles and missions." Donald J. Dobner (TC) 1681
Implementation of advanced simulation techniques for predicting the Saturn V launch vehicle system behavior. J. E. Snyder, E. R. Bennich, and Y. H. Lindsey 998
Performance comparison of gun-launched scramjets for various fuels. Nasim F. Amin and Sannu Mölder (EN) 1089
Saturn V launch vehicle systems analysis application. F. B. Williams and L. P. Thompson (EN) 1265
Prediction of availability to launch-on-time. R. A. Holtz and D. R. Jackson (EN) 1269
On the calculation of penetration aids ejection velocities using downrange radar and optical data. Jon D. Collins and Robert W. Rakestraw 39
Fault tree analysis as applied to missile systems. Robert F. Sellars (EN) 1099

Spacecraft and Extraterrestrial Surface Systems

On-site rectification of meteorological satellite pictures. S. R. Dauncey 230
Design of a solar-electric propulsion system for interplanetary spacecraft. J. H. Molitor, D. Berman, R. L. Seliger, and R. N. Olson 176
Solar-electric propulsion system performance for a close solar probe mission. William C. Strack 469
Major system design problems for deep space probes. William J. Dixon 1121
Mariner IV midcourse propulsion system impulse and accuracy prediction. James H. Kelley 1217
Gas bag concept for a stowable, omnidirectional, multiple-impact landing system. John R. McGehee 1359
Nonhomogeneous impact attenuator for spherical landing capsule. Gerald J. Cloutier (EN) 1084
A new concept in artificial gravity systems. Charles A. Lindley 3
Project EGRESS. John P. Dunn and Patrick C. Carroll 9
Low-thrust propulsion for the MORL. Milton Goodman 183
Dynamic analysis of a lunar-surface vehicle. E. F. Styer and D. H. Merchant 208
Sensitivity of manned planetary spacecraft design to radiation uncertainties. Raymond C. Savin, Jerry M. Deerwester, and Alfred C. Masey 249
Safety assurance for extended manned missions. Roy B. Carpenter Jr. 448
Study of electric propulsion for manned Mars missions. R. V. Ragsac 462
An evolutionary program for manned interplanetary exploration. M. W. Jack Bell 625
A comprehensive reliability analysis of redundant systems. Robert S. Pringle and Philip M. Gresho 631
Implications of maneuvering-range constraints on lifting-vehicle design. Johann Lau 639
A comparative design analysis of three configurational families for manned earth entry at hyperbolic speeds. D. J. Shapland and W. F. Munroe 732
Fixed-point simulation of onboard orbit determination. T. L. Gunckel II and J. C. Elsey 885
Systematic comparison of Venus swingby mode with standard mode of Mars round trips. J. M. Deerwester and S. M. D'Haem 904
Integrated orbital logistics support. Robert H. Lea 1010
The lunar pogo stick. H. S. Seifert (EN) 941
Statistical variations in performance of rocket engines. Mario W. Cardullo (EN) 1103
Comment on "Study of electric propulsion for manned Mars missions." Charles L. Zola (TC) 1405

TESTING

Ground Testing and Simulation

Structural dynamics aspects of the Gemini program. J. A. Callahan . . 58
Solar incidence factors for thermal analysis of imperfectly collimated radiation in solar simulators. R. P. Bobco and C. P. Stensgaard Jr. 236
Development of a regenerative collector target system for ion engine testing. J. D. Trolinger and J. I. Shipp 457
Performance of an aerodynamic molecular beam chamber for cryopumping and adsorption pumping studies. R. F. Brown and J. H. Heald Jr. 476
Analyses and tests of thermal scale models of a simulated spacecraft. R. K. Thompson, V. G. Klockzien, and G. E. Dufoe 486
Aerodynamics of free-flying wind-tunnel models determined from telemetered accelerations. Victor L. Peterson, George G. Mateer, and Dean R. Harrison 503
Wind-tunnel simulation or rocket vehicles in flight with two-phase-flow rocket plumes. Richard H. Adams 518
Electron-bombardment thrusters using liquid-mercury cathodes. H. J. King, W. O. Eckhardt, J. W. Ward, and R. C. Knechtli 599
Development and testing of a lightweight flight prototype ion engine system. H. J. King, J. H. Molitor, D. G. Kovar, and W. J. Muldoon 603
Pressure recovery in hypersonic engine test facilities. James L. Grunnet and Marion L. Laster 643
Rocket exhaust plume radar attenuation and amplitude/phase noise. L. D. Smoot and T. J. Seliga Jr 774
Comparison of aerodynamic data from the Gemini flights and AEDC-VKF wind tunnels. B. J. Griffith 919
Effects of exhausts from aluminized solid propellants on launch facilities. Edward J. Lays and Eugene A. Darrow 934
Free-flight measurements of aerodynamic viscous effects on lifting re-entry bodies. C. C. Horstman and M. I. Kussoy 1064
Free flight simulated on ground with the Apollo Saturn V space vehicle. George L. von Pragenau 1211
Some effects of motion cues on manual tracking. Laurence R. Young. 1300
Wind-tunnel and full-scale forces on rocket sleds. Daniel J. Krupovage, Larry C. Mixon, and Otto T. Pokorny 1346
Space enviornment simulator for materials studies at NASA Ames. Bernard E. Cunningham and Robert E. Eddy (EN) 280
Martian sand and dust storm experimentation. Richard G. Hertzler, Emile S. J. Wang, and Ollie J. Wilbers (EN) 284
Small liquid propulsion systems testing in a space environment simulator. T. E. Mouritsen and C. E. Sullivan (EN) . . . 687
Results from short-duration altitude-chamber techniques for simulating rocket base heating problems. H. B. Wilson Jr. (EN) 693
Development of a facility for supersonic combustion simulation. Norman E. Scaggs and Robert G. Dunn (EN) 803
Water immersion simulation of extravehicular activities by astronauts. Otto F. Trout Jr. (EN) 806
Protecting precision laboratory equipment from vibration environment. Serge Kunica (EN) 944
Application of the hydraulic analogy to axisymmetric nonideal compressible gas systems. David M. Adams 359
Cesium electron-bombardment ion microthrusters. G. Sohl, V. V. Fosnight, S. J. Goldner, and R. C. Speiser 1180
Ignition of hypergolic propellants in a simulated space environment. Raymond L. Chuan and Paul C. Wilber (EN) 282
A method for observing phenomena in an arbitrary pipe flowfield of revolution. Tatsuo Yamanaka and Hisao Azuma (EN) 1272
Wind-tunnel studies of ground-wind loads on Saturn launch vehicles. George W. Jones Jr. and Moses G. Framer 219
An application of automatic carpet plotting to wind-tunnel data reduction. Dennis M. Jeemen, J. Peter Reding, and Lars E. Ericsson (EN) (see also Errata, p. 832) 408
Development of a terminal landing rocket system for Apollo-type vehicles. Jack F. Lands Jr. 333
Drag and stability of Mars probe/lander shapes. Maigonis V. Krumins 1052
Satellite thermal simulation by a hybrid computer. David Berman . . . 243
Apollo ECS man-rated simulation systems. W. B. Tappen 452
High-speed analysis of wind-induced dynamic loads on vertically rising vehicles. Chris J. Van Der Maas 583
Simulation of aerospace flight acceleration and dynamic pressure environments for biodynamics research. Neville P. Clarke, Walter M. Wolff, John J. Gokelman, and Henning E. von Gierke 751
Implementation of advanced simulation techniques for predicting the Saturn V launch vehicle system behavior. J. E. Snyder, E. R. Bennich, and Y. H. Lindsey 998
Recent experience with manned tests in the NASA space environment simulation laboratory. R. D. Filbert and H. C. Sherwin (EN) 689
Van Allen belt simulation. Charles L. Mack (EN) 819
Technique to evaluate surface contamination due to rocket exhaust impingement. M. H. Hauptman and H. Fine (EN) 959
A stability analysis of self-calibration techniques. John F. Jones 554
Recovery of high-performance re-entry vehicles by drag brakes plus parachutes. Harry J. Steck, Richard J. Berman, and Thomas T. Blanco 746
Experimental control-wing hinge moments of a transonic-supersonic. rolling, maneuvering, guided missile. F. X. Pfenneberger 925

A frangible sounding rocket vehicle design. D. D. Dunfee and G. K. Oss (EN) ... 823
Effect of Point Arguello wind variability upon range safety. Richard G. Stern (EN) ... 1112

Flight Testing

Laboratory and flight test program to evaluate the space stability of highly specular reflective surfaces. K. N. Marshall, N. J. Douglas, H. E. Pollard, and R. E. Rolling ... 912
Lincoln experimental satellite program (LES-1, -2, -3, -4). H. Sherman, D. C. MacLellan, R. M. Lerner, and P. Waldron ... 1448
Parachute testing at altitudes between 30 and 90 kilometers. John C. McFall Jr. and Harold N. Murrow (EN) ... 796
Surveyor white paint degradation. W. A. Hagemeyer Jr. (EN) ... 828
Comparison of aerodynamic data from the Gemini flights and AEDC-VKF wind tunnels. B. J. Griffith ... 919

Sensors and Measurements

Development aspects of a miniature fluid counter. Robert A. Kantola 991
Use of radio frequency bridge for re-entry plasma diagnostics. A. E. Fuhs, W. R. Grabowsky, and O. L. Gibb ... 327
An ultrareliable sensing system for vehicles with limited sparing capability. R. Weiss and I. Nathan ... 1151
Aerodynamic design considerations and wind-tunnel test of a high-altitude air sampler. Harold C. Larsen ... 1254
Calorimetric absorptance measurements of thermal-control coatings between room and cryogenic temperatures. W. F. Schmidt and R. W. Olenick ... 1495
Radioactive dispersions for radioactive ablation sensors. Robert A. Florentine, J. F. Schneider, and D. S. Gicking (EN) ... 1083

VEHICLE DYNAMICS, STABILITY, AND CONTROL

Aeroelasticity and Buffeting

Aeroelastic instability caused by slender payloads. Lars Eric Ericsson ... 65
Wind-tunnel studies of ground-wind loads on Saturn launch vehicles. George W. Jones Jr. and Moses G. Farmer ... 219
Relative influence of atmospheric properties on launch vehicle design. R. E. Bieber ... 224
A technique for analyzing control gains using frequency response methods. Robert S. Ryan and Harry Harerow ... 302
A suboptimal approach to the control of systems containing uncertain parameters. Richard F. Whitbeck ... 1431
On structural compliance-induced coupling in a thrust-vector control system. Harold S. Curtis and Charles T. Hagstrom ... 1465
Aeroelasticity as a consideration in aerodynamic design of rolling, unguided research rockets. D. J. Baines and K. G. Pearson ... 1603
Calculated aeroelastic bending of a sounding rocket based on flight data. George E. Reis and Wayne D. Sundberg ... 1489
Fin structural design for high-performance sounding rockets. H. G. Sevier (EN) ... 1267
An application of automatic carpet plotting to wind-tunnel data reduction. Dennis M. Jecmen, J. Peter Reding, and Lars E. Ericsson (EN) ... 408
A material hysteresis model for transient dynamic analysis. Hassel Charles Schjelderup (EN) ... 541
Multivariate statistical analysis of wind sounding data. Chris J. Van Der Maas ... 74
High-speed analysis of wind-induced dynamic loads on vertically rising vehicles. Chris J. Van Der Maas ... 583
Controlled booster stage "BER" for sounding rockets. Marcel Bismut and Jacques Bouttes ... 1248
Use of wind shears in the design of aerospace vehicles. Robert S. Ryan, James R. Scoggins, and Alberta King ... 1526
Effect of rocket thrust-time curve on wind dispersion. Gary M. Griner ... 1533
Power spectra measurement for spacecraft vibration data. Allan G. Piersol ... 1613
An objective wind criterion for structural design of launch vehicles. Jerold M. Bidwell (EN) ... 1278

Control Theory and Technology, General

Command laws for magnetic attitude control of spin-stabilized earth satellites. Marc L. Renard ... 156
Attitude control of a satellite in an elliptic orbit. R. E. Busch and I. Flügge-Lotz ... 436
Applications of optimal control theory in aerospace engineering. Arthur E. Bryson Jr. ... 545
New developments and applications of the closed-loop stepping motor. T. R. Fredriksen ... 1159
On structural compliance-induced coupling in a thrust-vector control system. Harold S. Curtis and Charles T. Hagstrom ... 1465
A steering law satisfying the constant total time of flight constraint. Jack D. Culbertson ... 1470
An application of parameter optimization to hydraulic servo design. G. G. Evans, H. E. Vigour and F. J. Ellert ... 1483
An approach to control optimization for nonlinear systems. Robert M. Marchetti (EN) ... 1096
Final-value homing missile guidance. M. J. Abzug (EN) ... 279
Development and flight test of a flueric roll control system. B. J. Clayton and W. M. Posingies ... 151
Development of the Surveyor vernier propulsion system. M. Edmund Ellion, H. diCristina, A. R. Maffei, and A. Briglio Jr. ... 339
An adaptive tracking filter for bending-mode stabilization. Randall Gaylor, Robert L. Schaeperkoetter, and David C. Cunningham ... 573
Pseudorate sawtooth-pulse-reset control system analysis and design. E. D. Scott ... 781
Experimental control-wing hinge moments of a transonic-supersonic, rolling, maneuvering, guided missile. F. X. Pfenneberger ... 925
Development aspects of a miniature fluid counter. Robert A. Kantola 991
Saturn AS-501/S-IC flight control system design. James A. Frosch and Donald P. Vallely ... 1003
Explanation of the anomalous spin behavior of satellites with long, flexible antennae. B. Etkin and P. C. Hughes ... 1139
Mariner IV midcourse propulsion system impulse and accuracy prediction. James H. Kelley ... 1217
Hypersonic flows past transverse jets. Louis G. Kaufman II ... 1230
A suboptimal approach to the control of systems containing uncertain parameters. Richard F. Whitbeck ... 1431
Thermal diffusion separation of damping fluids in gyroscopes. Bertram Rockower (EN) ... 275

Entry and Landing Dynamics and Control

Model tests for structural response of Apollo command module to water impact. Wilfred E. Baker and Peter S. Westine ... 201
A parachute recovery system dynamic analysis. M. Neustadt, R. E. Ericksen, J. J. Guiteras, and J. A. Larrivee ... 321
Development of a terminal landing rocket system for Apollo-type vehicles. Jack F. Lands Jr. ... 333

Launch Vehicle and Missile Control

Development and flight test of a flueric roll control system. B. J. Clayton and W. M. Posingies ... 151
Relative influence of atmospheric properties on launch vehicle design. R. E. Bieber ... 224
A theory of the aerodynamics of the supersonic splitline gimbaled nozzle. Warren C. Strahle ... 262
A technique for analyzing control gains using frequency response methods. Robert S. Ryan and Harry Harerow ... 302
An adaptive tracking filter for bending-mode stabilization. Randall Gaylor, Robert L. Schaeperkoetter, and David C. Cunningham ... 573
Saturn AS-501/S-IC flight control system design. James A. Frosch and Donald P. Vallely ... 1003
Free flight simulated on ground with the Apollo Saturn V space vehicle. George L. von Pragenau ... 1211
Controlled booster stage "BER" for sounding rockets. Marcel Bismut and Jacques Bouttes ... 1248
A suboptimal approach to the control of systems containing uncertain parameters. Richard F. Whitbeck ... 1431
A gyroless solar pointing attitude control system for the Aerobee sounding rocket. Q. M. Hansen, E. A. Gabris, M. D. Pearson, and B. S. Leonard ... 1443
On structural compliance-induced coupling in a thrust-vector control system. Harold S. Curtis and Charles T. Hagstrom ... 1465
Sources, mechanisms, and control of roll resonance phenomena for sounding rockets. D. A. Price Jr. ... 1516
Use of wind shears in the design of aerospace vehicles. Robert S. Ryan, James R. Scoggins, and Alberta King ... 1526
Power spectra measurements for spacecraft vibration data. Allan G. Piersol ... 1613
An application of automatic carpet plotting to wind-tunnel data reduction. Dennis M. Jecmen, J. Peter Reding, and Lars E. Ericsson (EN) ... 408
Fin slots vs roll lock-in and roll speed-up. P. Daniels (EN) ... 410

Sloshing

Analysis of flexible baffles for damping tank sloshing. R. G. Schwind, R. S. Scotti, and Jörgen Skogh ... 47
Gradient stabilization of electrohydrodynamically oriented liquids. James R. Melcher and Mathew Hurwitz ... 864
Longitudinal vibration of a model space vehicle propellant tank. Daniel D. Kana and John F. Gormley ... 1585
A comparison of flexible and rigid ring baffles for slosh suppression. Luis R. Garza and Franklin T. Dodge (EN) ... 805
Mechanical model for longitudinally excited sloshing motion. Helmut F. Bauer and Jose Villanueva (EN) ... 1376

Spacecraft Attitude Dynamics and Control

Effect of man's motion on the attitude of a satellite. Corrado R. Poli ... 15
Control synthesis for spinning aerospace vehicles. Benjamin O. Lange, Alan W. Fleming, and Bradford W. Parkinson ... 142
Command laws for magnetic attitude control of spin-stabilized earth satellites. Marc L. Renard ... 156
Two-impulse attitude reorientation of an asymmetric spinning vehicle. Carl Grubin ... 306

Attitude control of a satellite in an elliptic orbit. R. E. Busch and I. Flügge-Lotz 436
Orientation of a rigid torque-free body by use of star transits. Charles B. Grosch 562
Attitude control of a flexible, spinning, toroidal manned space station. William B. Gevarter 878
Explanation of the anomalous spin behavior of satellites with long, flexible antennae. B. Etkin and P. C. Hughes 1139
Gravitational excitation of an extensible dumbbell satellite. V. Chobotov 1295
A split-damper inertially coupled passive gravity-gradient attitude control system. B. E. Tinling, V. K. Merrick, and D. M. Watson .. 1437
A new passive hysteresis damping technique for stabilizing gravity-oriented satellites. J. R. Alper and J. P. O'Neill 1617
Stabilization system analysis and performance of the GEOS-A gravity-gradient satellite (EXPLORER XXIX). Vincent L. Pisacane, Peter P. Pardoe, and B. Joy Hook 1623
Spinning spacecraft attitude control via the environmental magnetic field. Phillip C. Wheeler 1631
Attitude stability criteria for dual spin spacecraft. Peter W. Likins ... 1639
Dynamic equations for connected rigid bodies. Stephen H. Sandler (EN) 684
Optimal satellite orientation and acquisition problem. E. G. Smith (EN) 1379
An optimum attitude profile to minimize the accumulation of gravity-gradient torque impulse. James P. C. Clark (EN) 1669
Statistics of rigid body moment of inertia computation. Jon D. Collins and William T. Thomson (EN) 1673
Comment on "Preliminary survey of dynamic stability of a cable-connected spinning space station" V. Chobotov (TC) 832
Reply by author to V. Chobotov. C. D. Pengelley (TC) 832
Low-thrust propulsion for the MORL. Milton Goodman 183
Effects of solar environment and aerodynamic drag on structural booms in space. S. Z. Fixler 315
Pseudorate sawtooth-pulse-reset control system analysis and design. E. D. Scott 781
Dynamic performance of low-thrust, cold-gas reaction jets in a vacuum. H. Greer and D. J. Griep 983
An ultrareliable sensing system for vehicles with limited sparing capability. R. Weiss and I. Nathan 1151
A gyroless solar pointing attitude control system for the Aerobee sounding rocket. Q. M. Hansen, E. A. Gabris, M. D. Pearson, and B. S. Leonard 1443
Active damping concept for gravity gradient satellite attitude control. A. S. Gutman (EN) 953
Comment on "Dynamic equations for connected rigid bodies." Robert E. Roberson (TC) 1564
Reply by author to R. E. Roberson. S. H. Sandler (TC) 1564

Uncontrolled Rocket Dynamics

Flight dynamics of a bomb with cruciform tail. W. R. Chadwick 768
Application of parameter management to roll rate control in the ballistic missile target system. Louis M. Goldberg 1243
Controlled booster stage "BER" for sounding rockets. Marcel Bismut and Jacques Bouttes 1248
Calculated aeroelastic bending of a sounding rocket based on flight data. George E. Reis and Wayne D. Sundberg 1489
Sources, mechanisms, and control of roll resonance phenomena for sounding rockets. D. A. Price Jr. 1516
Effect of rocket thrust-time curve on wind dispersion. Gary M. Griner 1533
Aeroelasticity as a consideration in aerodynamic design of rolling, unguided research rockets. D. J. Baines and K. G. Pearson 1603
Dynamic stability of a 5-in. projectile with nonlinear magnus moment. W. R. Chadwick (EN) 1263
Fin structural design for high-performance sounding rockets. H. G. Sevier (EN) 1267
Real-time prelaunch meteorological system. Roy I. Glass and Louis D. Duncan (EN) 1276
A spin-yaw instability criterion for the ascending ballistic missile. L. H. Ohman (EN) 1374
Impact dispersion due to mass and aerodynamic asymmetries. Barbara F. Fuess (EN) 1402
